

Atlantic Development & Investment's, Inc. has a proven track record in developing energy-efficient affordable communities. Atlantic's developments include: advanced water conserving appliances and features, Energy-star rated appliances, energy-efficient lighting, a cool roof, xeriscaping, and a solar photovoltaic system to offset a percentage of the common area electrical usage. When possible, local and recycled products will be used in the construction process. In essence, Atlantic Development & Investment's, Inc.'s goal is to maximize energy-efficiencies in development, in order to create the most sustainable, cost-effective development over the long term.
